

How Curio works

Curio is a science explorer for kids: ask a question, an AI tutor explains it simply, and three new questions keep you exploring. Follow one question from your screen to our home computer and back, in about three seconds.

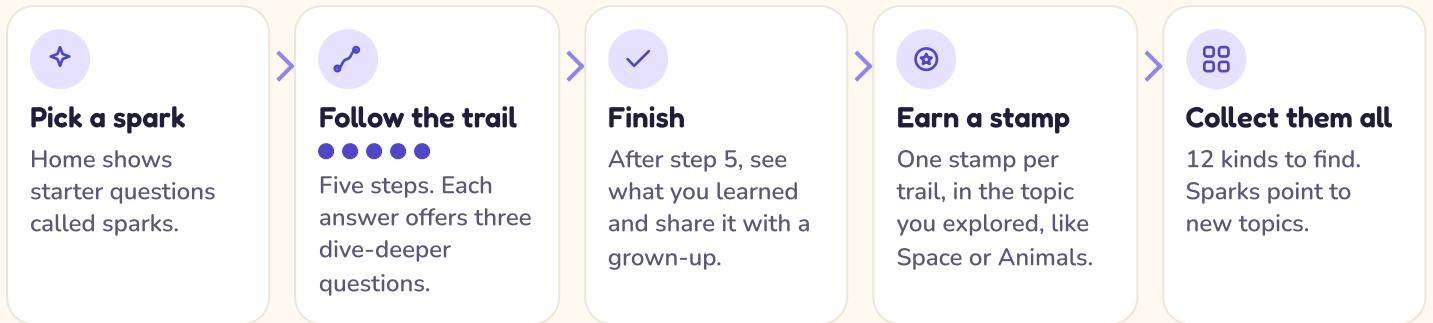

..... The dotted line is the loop: every dive-deeper question starts again at step 1 and makes the same round trip.

USING THE APP

From a spark to a stamp

Questions link together into a trail. Finish a trail and you earn a stamp for your collection.

THE PARTS

What each part does
